- Lectures and activity days
- Conferences and exhibitions
- Networking and social events
- Standards development
- Member services and discounts
- Awards and bursaries
- Quarterly magazine
- Industry handbook
- Webinars and podcasts

www.theSCTE.eu

Training

SCTE training courses have achieved wide acceptance as the standard for young technicians wishing to enter the field of broadband telecoms. Designed for online use, the courses are used in-house by a number of international operating companies and SCTE instructors work with engineers in a variety of organisations worldwide. They offer an excellent grounding in the basic principles and mathematics that make up the framework of broadband telecommunications technology and provide the foundations of an engineering career. SCTE members receive special discounts.

Accreditation

As a Learned non-profit Society, the SCTE provides accreditation and certification for its members, giving them professional standing within the industry. Full Members and Fellows are able to use the designations MSCTE and FSCTE after their names. Technicians, Associates and Students may use TMSCTE, AMSCTE and SMSCTE respectively.

Networking opportunities

The Society offers a variety of annual networking opportunities to members. These include lecture meetings, conferences, exhibitions, dinners, cocktail parties, activity days, technician open days and representation at various international exhibitions and conferences (such as IBC and ANGA COM), where members can use SCTE exhibition facilities. Our Annual Dinner and Awards where excellence in the broadband industry is a highlight. Sponsorship opportunities are available at all our events.

Lectures

The Society stages lecture meetings regularly throughout the year, as well as through its Benelux Group at selected European venues. The lecture meetings are free to members and represent excellent value for the price of annual membership. Excellent networking opportunities via informal lunches and cocktail receptions are provided.

Webinars and Podcasts

The SCTE offers bespoke webinars at a discounted rate to members, providing up to 90 minutes of dedicated time to create compelling, original content to educate your viewers, raise your profile and elevate your brand. We also provide our Corporate Members with a complimentary podcast hosted on our Spotify channel.

Awards, bursaries and standards

The Society chairs the British Standards Committee for Cable Systems and represents the UK at European (CENELEC) and world (IEC) levels. It also runs the annual SCTE Technology Innovation Awards, a range of individual Achievement Awards and the Challenge Awards in the Balkans. We also provide a limited series of bursaries to international events (such as FTTH Conference, ANGA COM and IBC), where the SCTE and its partners cover the cost of flights, hotels and conference entrance to the event.

Publications

The SCTE publishes Broadband Journal, a quarterly magazine distributed to all members and at major international conferences and exhibitions throughout the year. Containing news technical data, standards updates, opinion pieces and features as well as articles on many aspects of broadband and telecommunications technologies; some reporting over-the-horizon developments that are not yet out of the laboratory. Broadband Journal caters for all levels of experience and welcomes contributions from members, the industry and the academic world. Broadband Journal is also available online.

The Society also publishes a Members Handbook which contains essential technical specifications and technological updates, as well as a membership directory and register of SCTE consultants.

SCTE history

The SCTE is a non-profit making organisation managed by an Executive Committee consisting of elected volunteers from the broadband industry. It is a group of engineers, technicians, installers and like-minded people involved in broadband telecommunications passionate about sharing technical expertise with others to improve the general standing of the industry.

The SCTE was founded in 1945. Originally called 'The Society of Relay Engineers', with the advent of cable television it became the 'Society of Cable Television Engineers'. In 1994, reflecting the changes in the industry, it adopted the name 'Society of Cable Telecommunication Engineers'.

Whilst retaining the well known 'SCTE' brand name, it is now known as the 'Society for Broadband Professionals' to cover the entire spectrum of broadband telecoms.

Member discounts

SCTE Members receive member discounts to attend key industry events worldwide. Discounts on PR packages, market research data and business stationery are other benefits of membership.

Website and archive

The website is regularly updated and carries lecture presentations available for download, standards reports and the latest technical data and members receive a login and password for our substantial Members Area.

Membership

Membership of the SCTE is open to anyone worldwide who has an interest in the delivery of broadband communications. Those qualified for the engineering grades may aspire to full Membership and Fellowship of the Society, which confers the right to have MSCTE or FSCTE after their name. The SCTE is delighted to welcome Corporate Members, offering a wealth of benefits at exceptional value, including a free personal membership programme as part of the package. It also has classifications for Student and Associate Members.

Membership of the Society is composed of the following seven categories:

- Honorary Fellows
- Fellows
- Members
- Technicians
- Associates
- Students
- Corporate
