The Society for Broadband Professionals Skills for Success

SCTE launches Virgin Media Taster Training Days

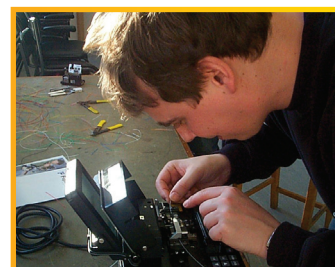

The SCTE has planned a "Virgin Media Taster Training Day" series and would like to invite you to join us and support this initiative. The training days are planned for **14 May 2013** at Virgin Media

(VM) Hook, **15 May 2013** at VM Birmingham Eagle Court and **16 May 2013** at VM Bradford. The SCTE believes that these training days will provide vendors with a new opportunity to engage with VM technicians and engineers in a friendly and professional setting.

The training days are advertised on the VM intranet and targeted at VM technicians and engineers who are new to the business and would like an introduction to a number of technology topics as well as the opportunity for "hands-on" experience with some vendors' products.

- Delegates will be able to pre-register their attendance at the Taster Day and also register on the delivery day.
- The Taster day will run in two lecture rooms.
- Room "One" will be used for formal half-hour "vendor-agnostic" technology presentations by VM senior staff and vendors.

- Room "Two" will provide vendor "hands-on" workstations, where VM staff can work with products and test equipment used in different parts of the broadband network.
- The morning's schedule of lectures and hands-on experience will be repeated in the afternoon.
- Coffee will be available all day from an area close to the SCTE Membership Promotion booth.
- The SCTE booth will provide SCTE membership packs and the opportunity for VM staff to view the SCTE formal training packages.
- A free buffet lunch will be offered to delegates.
- Taster Day delegates will be provided with an invitation to an SCTE cocktail party at a local hostelry, where a free drink, complimentary snacks and sandwiches will be available.

For further details, fax this form to the SCTE office or email it to office@thescte.eu.

Would you like to receive more SCTE training information? Yes ☐ No ☐			

Founded in 1945, the SCTE is a Learned Society and non-profit making organisation whose aim is to raise the standard of broadband engineering in the telecommunications industry. The Society particularly concerns itself with the training and career advancement of technical professionals in the field.

Please initially contact Chris Bailey on chrisbailey21@btopenworld.com to signal your interest in participating in these training days. For further information, email the SCTE office at office@thescte.eu or see <http://goo.gl/r5z8U>
