The Technology Behind Last Mile Broadband

#connectyourworld

About Us

**Creating a safer, more connected world
for over two decades with:**

- Hybrid Connectivity
- Systems Integration
- End to End Deployments
- Intelligent Data Streaming
- 24/7 Support

Our Mission

Putting the Right Technology at the Edge of Every Application

Empowering the world's leading industries and sectors with expertise and innovation.

Resilience & Emergency Preparedness

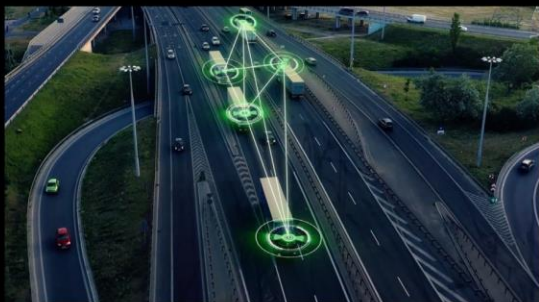

Healthcare & Pre-hospital Environments

Security & Policing

Smart Cities

Connected Transport

Digital Inclusion

Energy & Utilities

Maritime and offshore

Connectivity & Network Services

Integrated Solutions

24/7 Managed Support & Services

Research & Development

Featured Products

Hybrid Edge Appliance

The Hybrid Edge Appliance takes hybrid connectivity to the next level offering unrivalled performance - even in areas of low or no cellular coverage. The solution bonds connectivity from 4G, 5G and satellites to ensure an always connected experience.

Excell 4G LTE Antenna

UAV Streamer

Featured Products

Excell 4G LTE Antenna

Excell enhances cellular coverage, ensuring reliable connectivity in any environment. Its innovative antenna combines directional and omni-directional elements, adapting to signal conditions for optimal coverage and performance.

UAV Streamer

Linx Hub

Featured Products

UAV Streamer

Drone technology often faces a problem: it's hard to share video from the drones in real-time. Our UAV Streamer, changes that. It works with your current drone setup, so everyone on your team can see live video, not just the pilot. Just plug it into the drone controller, and you're all set - making your drone operations smoother and more efficient.

LinX Hub

Body-worn Camera

Featured Products

Excell 4G LTE Antenna

UAV Streamer

Take your network with you: The Linx Hub Portable Wi-Fi Hotspot brings an 'out of office' experience to any environment by ensuring emergency responders can stay in touch, coordinate efforts and access vital information from anywhere.

Featured Products

UAV Streamer

Linx Hub

Body-worn Camera

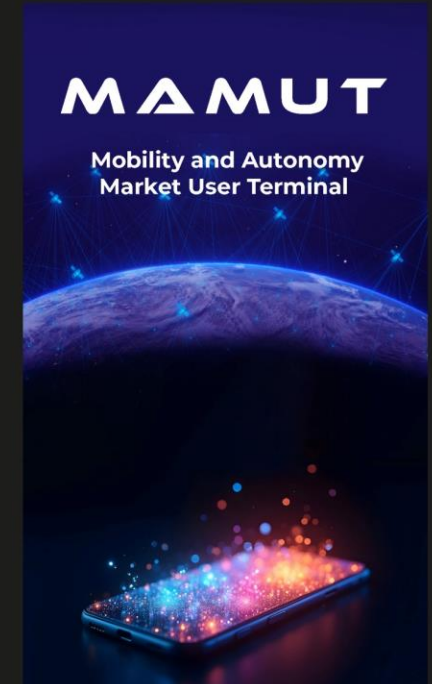

Excelerate's body-worn cameras provide real-time video streaming, delivering instant, accurate situational awareness. Footage can be streamed to authorised locations, enhancing communication between the wearer and those monitoring remotely. Trusted and compact, they support effective decision-making in critical situations.

Unbreakable Connectivity On-The-Move

Solving real-world problems

Connected vehicle and remote teams

From smart ambulances, mobile police stations to incident command units and everything in-between, our range of connectivity solutions deliver unrivalled performance even in remote environments.

Enhancing situational awareness

We ensure that our customers can access and share the information they need to make informed decisions quickly.

Driving digital innovation

We are committed to making technology useful and accessible to users and have successfully introduced innovative solutions that are now in everyday use.
